ANNEX

Smart Adapter piloted at Garden Waterfront I and II @ Tengah

Developed in collaboration with M1 Net Ltd and STARSG Technology Pte Limited, the Smart Adapter connects to a dedicated mobile application, giving residents greater visibility of how much electricity they use. This helps them make more informed decisions about their consumption and adjust their usage habits to save energy.

More than 2,000 flats across Garden Waterfront I and II @ Tengah will be equipped with the Smart Adapter, with plans to extend the rollout to about 5,600 more homes across four projects in Tengah. The Smart Adapter and basic energy-monitoring service are provided at no cost to residents. Those who want more detailed information on their energy use can also choose to subscribe to Smart Home packages offered by commercial vendors

The Smart Adapter is installed alongside the Smart Distribution Board in the service closet within the flat. The adapter lets residents monitor their energy usage via an app.
