

# How to use your PWCS refuse chute

Residents living in precincts where a PWCS is installed will benefit from more efficient and hygienic waste collection, and a cleaner and greener environment.

Similar to all refuse chute systems, using the PWCS incorrectly can cause chokages or a breakdown in the system, inconveniencing you and your neighbours. To avoid this, please dispose of your refuse correctly according to the following guidelines:

The size of refuse bag should be smaller than the hopper opening.

To prevent chokage and fire in the PWCS, please **DO NOT** throw the following items into the refuse chute:

**Long objects** such as umbrellas and brooms

**Bulky items** such as carton boxes and pillows

**Heavy objects** such as potted plants and electrical appliances

**Renovation debris** such as timber, bricks and cement

**Flammable items** such as paints and kerosene, and burning objects (e.g. charcoal with embers and cigarette butts)

**Note :** You may contact your Town Council if you require assistance in disposing bulky items.
