

About the BTO Coordination Committee

Set up in mid-2024, the multi-agency BTO Coordination Committee was formed to identify key issues faced by new residents when moving in, and to streamline processes across agencies to improve the move-in experience. Agencies have worked on narrowing the time between the completion of flats and the readiness of other key amenities so that residents can enjoy them soon after they move in.

2 Led by MND and HDB, the Committee includes LTA, NEA, ECDA, the Infocomm Media Development Authority (IMDA), and the People's Association (PA) who are key partners in the building, delivery, and management of the infrastructure and services related to new BTO projects.
